Pediatric Dermatology Vol. 15 No. 6 497–504, 1998

Subject Index, Volume 15, 1998

ABCD rule, of dermatoscopy, 308(c)
Acanthosis nigricans, in Cushing disease after hypercortisolemia resolution, 253–258
Acne fulminans-associated granulation tissue, pulsed dye laser therapy for, 396–398
Acne vulgaris, moderate, isotretinoin *vs.* conventional regimens for, 329–331(c)
Acquired immunodeficiency syndrome (AIDS), mucocutaneous manifestations of, 429–434
Acropigmentation of Dohi, in twelve-year old boy, 242(c)
Acropustulosis, infantile
  corticosteroids for, 337–341
  dapsone for, 339–340
  scabies history and, 337–338
Acute hemorrhagic edema (AHE), of childhood, 91–96
Acyclovir for herpes simplex infections, 156–157
Adams-Oliver syndrome, with unusual central nervous system alterations, 48–50
AHE (acute hemorrhagic edema), of childhood, 91–96
AIDS (acquired immunodeficiency syndrome), mucocutaneous manifestations of, 429–434
Alagille syndrome, xanthoma resolution after liver transplantation, 199–202
Albinism, oculocutaneous, in Hermansky-Pudlak syndrome, 375–377
Alopecia
  in childhood systemic lupus erythematosus, 342–346
  in HIV/AIDS infected children, 433
  in neonatal lupus erythematosus, 38–42
Alopecia areata
  monthly oral corticosteroid pulse for, 313–317
  ophiasis inversus, as rare pattern of, 326–327(c)
  with pili annulati, 271–273
Analgesia, for warts cryotherapy, EMLA for, 129–133
Angiogenesis, integrins and integrin antagonists in, 154–155
Antithrombin III
  concentrate, for purpura fulminans, 177
  consumption, in purpura fulminans, 175
Aplasia cutis congenita, of scalp with limb malformations and central nervous system alterations, 48–50
Atopic dermatitis
  EMLA cream for molluscum contagiosum curettage with, 309–312
  epidemiology and clinical patterns in India, 347–351
  glucocorticoid-treated, knemometry of, 7–11
  in HIV/AIDS infected children, 433
  lesions, *Staphylococcus aureus* isolation from, 194–198
  onset, precipitated by menarche, 74(c)
  physiological sleep disturbance in, 264–267
  symptoms, decreased following massage, 390–395
Atrophoderma vermiculata, with unilateral lesions, 285–286
Auditory-brainstem evoked potential calcium chloride electrode paste, calcinosis cutis from, 27–30
Axillary freckling, with LEOPARD syndrome, 125–128

Bacille-Calmette-Guérin, postvaccination inflammatory papules and, 73–74(c)
Basic fibroblast growth factor (bFGF), interferon alpha for tufted angioma and, 483(c)
Blistering disorders. *See* Bullous lesions; *specific blistering disorders*
Bronchogenic cyst, cutaneous, 277–281
Bruisability, in Cushing disease after hypercortisolemia resolution, 253–258
Bullous lesions
  hemorrhagic, in Henoch-Schönlein purpura, 357–359
  mastocytoma on palm, 386–387
  update on, 156–157
Bullous pemphigoid
  in infancy, 108–111
  presentation, prognosis and immunopathology, 184–190

Café au lait spots
  with LEOPARD syndrome, 125–128
  with Mongolian spot, halo disappearance of, 70–71(c)
Calcification, dystrophic periocular, intralesional corticosteroids and, 23–26
Calcinosis cutis, after calcium chloride electrode paste application, 27–30
Callosites, in tethered spinal cord syndrome with hyperhidrosis and nail dystrophy, 486–487(c)
Cancer genes, 157
Candidiasis, in HIV/AIDS infected children, 433
Cervicofacial hemangioma, with minor sternal malformation, 119–121
Child abuse
  differential diagnosis, 95
  urticaria pigmentosa mistaken for, 484–485(c)
CHILD syndrome, with linear eruptions, hypopigmented bands and verrruciform xanthoma, 360–366
Chylothorax, with generalized lymphangiomatosis and skin lymphangiomas in neonate, 296–298
Cimetidine, inefficiency for nonatopic children with molluscum contagiosum, 71–72(c)
Cleansers, usage patterns, socioeconomic level and, 134–137
Clear cell papulosis, with white macules in milk-line distribution, 328–329(c)
Collagenomas, eruptive, 269–270
Complement, in purpura fulminans, 175
Congenital disorders. *See specific congenital disorders*
Conradi–Hünermann syndrome, with unilateral distribution, 299–303
Contact sensitization, in children, 12–17
Contiguous gene syndromes, 148–149
Copper-dependent enzymes, Menkes' kinky hair syndrome and, 138–139
Corticosteroids
  for bullous pemphigoid in infancy, 108–111
  dystrophic periocular calcifications and, 23–26
  for infantile acropustulosis, 337–341
  pulse therapy, for alopecia areata, 313–317
  for purpura fulminans, 178
Cryotherapy
  EMLA analgesia for wart removal, 129–133
  for hemangioma, 410–411(c)
  peripheral nerve blocks for wart removal, 238–241
CTCL (chronic T-cell leukemia), nitrogen mustard for, 72(c)

Cushing disease, skin manifestations after hypercortisolemia resolution, 253–258
Cutaneous larva migrans (CLM), perianal, 367–369
Cutis verticis gyrata, in Turner's syndrome, lymphedema and, 18–22
Cyclosporin, dosage after liver transplantation, erythema elevatum diutinum and, 411–412(c)
Cysts
cutaneous bronchogenic, 277–281
median raphe of penis, 191–193
Cytokines, in purpura fulminans, 173–174
Cytomegalovirus infections, in HIV/AIDS infected children, 431

Dapsone
for infantile acropustulosis, 339–340
for pemphigus vulgaris, 381–383
Dermatitis syphiloides posterosive, after Hirschsprung disease surgery, 46–47
Dermatobia hominis, cutaneous myiasis caused by, 116–118
Dermatological surgery. practical advice for, 154 (Proceedings of SPD)
Dermatoscopy, for nevus spilus, 407–410(c)
Dermatosis, congenital erosive and vesicular healing with reticulated supple scarring, 214–218
Diamond-Gardner syndrome, 43–45
Diaper dermatitis, Jacquet
after Hirschsprung disease surgery, 46–47
etiologic diagnosis, 489(c)

Ectodermal dysplasia, with uncombable hair and vulvar lichen sclerosis, 446–449
EMLA cream
for cryotherapy analgesia, 129–133
for curettage of molluscum contagiosum in atopic dermatitis, 309–312
Epidermal nevus syndrome, neurological variant, 59–61
Epidermolysis bullosa acquisita, presentation, prognosis and immunopathology, 184–190
Erythema elevatum diutinum, after liver transplantation, cyclosporin dosage and, 411–412(c)
Erythema multiforme
differential diagnosis, 95
with herpetic whitlow, 384–385
Exanthem
asymmetric periflexural of childhood, 152
infectious, recent highlights in, 151–152
Eutectic lidocaine/prilocaine cream. *See* EMLA cream

Facial hemihypertrophy, in epidermal nevus syndrome variant, 59–61
Failure to thrive, with trichothiodystrophy, recurrent infections and death, 31–34
Fluconazole
for onchomycosis, 465, 469–470
for tinea capitis, 150, 229–231, 468
Focal dermal hypoplasia (Goltz syndrome), diagnosis of, 399–402
Folliculitis ulerythematosa reticulata, with unilateral lesions, 285–286
Fungal infections
in Cushing disease after hypercortisolemia resolution, 253–258
in HIV/AIDS infected children, 430–431
of nails (*See* Onychomycosis)

Generalized lymphangiomatosis, with chylothorax and skin lymphangiomas in neonate, 296–298
Generalized nevus spilus, and nevus anemicus with primary lymphedema, 293–295
Genetics developments, application to dermatology, 148–149
Gianotti-Crosti syndrome
recent findings, 151
related to rotavirus infection, 485–486(c)
Gingival tumor, in neonate, 318–320
"Gloves and socks" syndrome, parvovirus B19 infection and, 413–414(c)
Glucocorticoids, for atopic dermatitis, knemometry and, 7–11
Goltz syndrome (focal dermal hypoplasia), diagnosis of, 399–402
Griseofulvin, for tinea capitis, 150
Gyral malformation, in epidermal nevus syndrome variant, 59–61

Hair, uncombable. *See* Uncombable hair syndrome
Halo phenomenon, of Mongolian spot with café au lait spots, 70–71(c)
Hamartoma
fibrous hamartoma of infancy, in scrotum, 326(c)
lipofibromatous, of median nerve with macrodactyly and port-wine stains, 378–380
of perianal striated muscle, with hemangioma, 274–276
Hemangiomas
cervicofacial, with minor sternal malformation, 119–121
congenital, with milialike structures, 307–308
cryosurgery for, 410–411(c)
with perianal striated muscle hamartoma, 274–276
periocular, complications from intralesional corticosteroids, 23–26
Hemimegalencephaly, in epidermal nevus syndrome variant, 59–61
Henoch–Schönlein purpura (HSP)
cutaneous manifestations in young children, 426–428
differential diagnosis, 95
hemorrhagic bullous lesions in, 357–359
parvovirus B19 testing in, 71(c)
pulmonary hemorrhage with, 143(c)
Hermansky-Pudlak syndrome, 375–377
Herpes simplex infections
acyclovir for, 156–157
in HIV/AIDS infected children, 431
neonatal, with incontinentia pigmenti, 112–115
Herpes zoster infections, in HIV/AIDS infected children, 431
Herpetic whitlow, with erythema multiforme, 384–385
Hidradenitis, palmoplantar eccrine, 97–102
Hirschsprung disease, postoperative Jacquet erosive diaper dermatitis, 46–47
Hirsutism, in Cushing disease after hypercortisolemia resolution, 253–258
HIV infection, mucocutaneous manifestations of, 429–434
HSP. *See* Henoch-Schönlein purpura
Hunter's syndrome, pebbling of skin as marker for, 370–373
Hutchinson-Gilford syndrome (HGS), connective tissue disease and, 487–489(c)
Hyperbaric oxygen, for purpura fulminans, 178
Hyperhidrosis, in tethered spinal cord syndrome with callosities and nail dystrophy, 486–487(c)
Hyperpigmentation, in Cushing disease after hypercortisolemia resolution, 253–258
Hypertrichosis, and melanosis in bilateral distribution, 290–292

Hypertrichosis, with pseudoacanthosis nigricans over nape, 327–328(c)
Hypopigmented bands, in CHILD syndrome, 360–366

Ichthyosis, with LEOPARD syndrome, 125–128
Immunotherapy, for purpura fulminans, 178–179
Incontinentia pigmenti, with neonatal herpes simplex virus infection, 112–115
Infantile perianal pyramidal protrusion, constipation and, 143–144(c)
Integrin antagonists, in angiogenesis, 154–155
Interferon alpha, for tufted angioma, 483(c)
Interleukin-1, in purpura fulminans, 173–174
Isotretinoin, *vs.* conventional regimens for moderate acne vulgaris, 329–331(c)
Itraconazole
  for onchomycosis, 465–467
  oral solution, for onychomycosis, 467, 472–474
  pulse therapy, for tinea capitis, 225–228
  for tinea capitis, 150, 466–467

Jacquet diaper dermatitis
  after Hirschsprung disease surgery, 46–47
  etiologic diagnosis, 489(c)
Juvenile xanthogranuloma, with hematologic changes in dizygotic twins, 203–206

Kaposi's sarcoma, in HIV/AIDS infected children, 433
Keratitis, ichthyosis and deafness syndrome (KID), in half siblings, 219–221
Keratoderma epidermolytic palmoplantar, of Vorner (EPPK), 477–479
Ketoconazole shampoo, safety for infantile seborrheic dermatitis, 406–407(c)
KID syndrome, in half siblings, 219–221
Knemometry, in glucocorticoid-treated atopic dermatitis patients, 7–11

Larva, migrans, perianal, 367–369
Laser therapy
  pulsed dye, for acne fulminans-associated granulation tissue, 396–398
  for warts, peripheral nerve blocks for, 238–241
Laterothoracic exanthem, unilateral with acute lymphoblastic leukemia, 51–52
Leeches, medicinal, for purpura fulminans, 178
LEOPARD syndrome, 125–128
Leukemia
  acute lymphoblastic, with unilateral laterothoracic exanthem, 51–52
  chronic T-cell (CTCL), nitrogen mustard for, 72(c)
Leukocytoclastic vasculitis (LCV)
  with papulonecrotic tuberculid, 450–455
  in Wegener's granulomatosis, 354–355
Lichenoid reactions, mucosal, difficult differential diagnosis of, 72(c)
Lichen sclerosus
  penile, human papillomavirus in, 85–90
  vulvar, with ED and uncombable hair, 446–449
Lipoblastomatosis, of lower extremity in neonate, 210–213
Lipofibromatous hamartoma, of median nerve with macrodactyly and port-wine stains, 378–380
Lipopigment accumulation, in Hermansky-Pudlak syndrome, 375–377
Lip pits, congenital, 443–445, 459–463

Liver transplantation
  for Alagille syndrome, xanthoma resolution after, 199–202
  erythema elevatum diutinum after, cyclosporin dosage and, 411–412(c)
Lupus erythematosus
  in childhood systemic, 342–346
  discoid lupus erythematosus (DLE), case reports, 439–442
  erosions, in neonatal, 38–42
  malar rash, in childhood systemic, 342–346
  oral ulcers, in childhood systemic, 342–346
  pancytopenia, in neonatal, 38–42
Lymphangiomas, with generalized lymphangiomatosis and chylothorax in neonate, 296–298
Lymphatic mapping, in melanoma management, 421–425
Lymphedema
  with cutis verticis gyrata in Turner's syndrome, 18–22
  primary, with nevus anemicus and generalized nevus spilus, 293–295
Lymphomatoid papulosis, with exclusive acral involvement, 146–147(c)

Macrodactyly, with medial nerve lipofibromatous hamartoma and port-wine stains, 378–380
Malar rash, in childhood systemic lupus erythematosus, 342–346
Massage therapy, atopic dermatitis symptoms decreased after, 390–395
Mastocytoma, on palm, 386–387
Measles virus, in inner cell of acrosyringium of skin rash, 456–458
Medial nerve, lipofibromatous hamartoma, with macrodactyly and port-wine stains, 378–380
Median raphe cysts, of penis, 191–193
Melanoma, management, lymphatic mapping in, 421–425
Melanosis, and hypertrichosis in bilateral distribution, 290–292
Menarche, precipitating atopic dermatitis onset, 74(c)
Meningocele, rudimentary, clinical spectrum of, 388–389
Menkes' kinky hair syndrome, 137–139
Milia en plaque, of eyelid, 282–284
Milialike structures, with congenital hemangioma, 307–308
Moisturizers, usage patterns, socioeconomic level and, 134–136
Molluscum contagiosum
  curettage in atopic dermatitis, EMLA cream for, 309–312
  in HIV/AIDS infected children, 431–432
  nonatopic children with, cimetidine inefficiency for, 71–72(c)
  solitary giant, of sole, 222–224
Mongolian spot, with café au lait spots, halo disappearance of, 70–71(c)
Mycobacterium tuberculosis, papulonecrotic tuberculid, with leucocytoclastic vasculitis, 450–455
Myiasis, of skin caused by *Dermatobia hominis*, 116–118

Nail
  congenital malalignment of toenails, 154
  diseases, in children, 153–154
  dystrophy, in tethered spinal cord syndrome with hyperhidrosis and callosities, 486–487(c)
  fungal infections (*See also* Onychomycosis)
  twenty nail dystrophy of childhood, 154
Neonate
  congenital lipoblastomatosis of lower extremity in, 210–213

with generalized lymphangiomatosis, skin lymphangiomas and chylothorax, 296–298
gingival tumor in, 318–320
herpes simplex virus infection, with incontinentia pigmenti, 112–115
lupus erythematosus, unusual presentation of, 38–42
skin of, 150
Neurofibromas, with LEOPARD syndrome, 125–128
Nevi
atrophy with giant congenital melanocytic nevi, 287–289
giant congenital melanocytic (GCMN), with lower and upper extremity atrophy, 287–289
melanocytic, atrophy with giant congenital, 287–289
Nevus anemicus, with primary lymphedema and generalized nevus spilus, 293–295
Nevus, keratotic papules, in porokeratotic eccrine ostial and dermal duct, 141–142
Nevus comedonicus syndrome, 304–306
Nevus spilus
generalized, and nevus anemicus with primary lymphedema, 293–295
management of, 407–410(c)
Nutritional deficiencies, in HIV/AIDS infected children, 433

Onychomycosis
in children, 153–154
itraconazole oral solution for, 467, 472–474
management in children, 465–471
prevalence of, 464–465
Ophiasis inversus, as rare pattern of alopecia areata, 326–327(c)
Oral ulcers, in childhood systemic lupus erythematosus, 342–346
Osteomyelitis, preceding pyoderma gangrenosum and occult ulcerative colitis, 435–438

Pancytopenia, in neonatal lupus erythematosus, 38–42
Papular xanthoma, 65–67
Papules, postvaccination inflammatory, 73–74(c)
Papulonecrotic tuberculid, with leucocytoclastic vasculitis, 450–455
Parakeratosis pustulosa, clinical features and long-term follow-up, 259–263
Parvovirus B19 infection
disorders associated with, 151–152
"gloves and socks" syndrome and, 413–414(c)
petechial gloves and socks syndrome and, 35–37
testing, in Henoch–Schönlein syndrome, 71(c)
Patch testing, of children
clinical experience, 12–17
guidelines for, 68–69
Pebbling of skin, as Hunter's syndrome marker, 370–373
Pediculosis, in HIV/AIDS infected children, 432
Pemphigus vulgaris, dapsone therapy for, 381–383
Penis
lichen sclerosus, human papillomavirus in, 85–90
median raphe cysts of, 191–193
PEODDN (porokeratotic eccrine ostial and dermal duct nevus), 141–142
Perianal
infantile pyramidal protrusion and constipation, 143–144(c)
striated muscle hamaratoma, with hemangioma, 274–276
Perioral dermatitis, in identical twins, 144(c)
Petechial gloves and socks syndrome, caused by parvovirus B19, 35–37
PHACES syndrome, minor form of, 119–121
Phakomatosis pigmentokeratotica (Happle), 321–323
Phakomatosis pigmentovascularis, new type of, 293–295
Photosensitivity, in childhood systemic lupus erythematosus, 342–346
Pili annulati, with alopecia areata, 271–273
Pili triangulli et canaliculi. *See* Uncombable hair syndrome
Pityriasis lichenoides, 1–6
Plasma, fresh frozen, for purpura fulminans, 176
Plasmapheresis, for purpura fulminans, 178
Platelet disorder, in Hermansky-Pudlak syndrome, 375–377
Polyarteritis nodosa (PAN), cutaneous differential diagnosis, 354–355
Polymerase chain reaction, for herpes simplex virus disease, 156
Porokeratotic eccrine ostial and dermal duct nevus (PEODDN), 141–142
Port-wine stains, with macrodactyly and medial nerve lipofibromatous hamartoma, 378–380
Postvaccination inflammatory papules, Bacille-Calmette-Guérin and, 73–74(c)
Progeroid syndrome, connective tissue disease and, 487–489(c)
Prostacyclin, for purpura fulminans, 177
Protein C
concentrate, for purpura fulminans, 177
deficiency, in purpura fulminans, 174–175
Protein S deficiency, in purpura fulminans, 174–175
Proto-oncogenes, in cancer, 157
Pseudomonas aeruginosa, fatal septicemia and vasculitis in premature infant, 122–124
Psoriasis
childhood generalized pustular, treatment effectiveness in, 144–146(c)
in HIV/AIDS infected children, 433
with vitiligo, in nine-year old boy, 242–243(c)
Pulmonary hemorrhage, with Henoch-Schönlein purpura, 143(c)
Pulsed dye laser therapy, for acne fulminans-associated granulation tissue, 396–398
Pulse therapy
for alopecia areata, 313–317
for onychomycosis, 467
for tinea capitis, 225–228
Purpura fulminans (PF), 169–183
PUVA therapy, bath, for vitiligo, 53–55
Pyoderma gangrenosum, preceded by osteomyelitis in occult ulcerative colitis, 435–438

Rotavirus infection, Gianotti-Crosti syndrome related to, 485–486(c)

Scabies
infantile acropustulosis, 337–338
in HIV/AIDS infected children, 432
Scarring, reticulated supple in healing of congenital erosive and vesicular dermatosis, 214–218
Scleroatrophic syndrome of Huriez, in infant, 207–209
Scleroderma, in children, 157–158
Sclerodermoid conditions, in children, 157–158
Seborrheic dermatitis, infantile, ketoconazole shampoo safety for, 406–407(c)

Septicemia, *pseudomonas,* in premature infant, 122–124
SLE. *See* Systemic lupus erythematosus
Sleep disturbances
in atopic dermatitis, 264–267
sleep and, 324–325 (editorial)
Society for Pediatric Dermatology, proceedings of 1997 meeting, 148–160
Staphylococcus aureus, isolation from atopic dermatitis lesions, 194–198
Sternal malformation, with cervicofacial hemangioma, 119–121
Stevens-Johnson syndrome, 156
Striae, in Cushing disease after hypercortisolemia resolution, 253–258
Sutures
breakage, subcuticular 'spider' stitch for, 480–481
pursestring, 62–64
Swartzman reaction, 172–173
Sweet syndrome, 95

Talc usage patterns, socioeconomic level and, 134–137
Terbinafine
for onchomycosis, 465, 467–4469
pulse therapy, for tinea capitis, 56–57
for tinea capitis, 150, 468
Tethered spinal cord syndrome, with callosities, nail dystrophy and hyperhidrosis, 486–487(c)
Tinea capitis
fluconazole for, 229–231, 468
griseofulvin for, 151
itraconazole for, 466–467
itraconazole pulse therapy for, 225–228
terbinafine for, 468
terbinafine pulse therapy for, 56–57
treatment options for, 150
Tinea nigra, diagnosis, 223–224
Toenails, congenital malalignment, 154
Trachyonychia, 154
Trichophyton tonsurans, fluconazole for, 229–231
Trichothiodystrophy, with recurrent infections, failure to thrive and death, 31–34
Tuberculid, papulonecrotic, *Mycobacterium tuberculosis* with leucocytoclastic vasculitis, 450–455
Tufted angioma, interferon alpha for, 483(c)
Tumor necrosis-factor α, in purpura fulminans, 173–174
Turner's syndrome, cutis verticis gyrata in, lymphedema and, 18–22
Twenty nail dystrophy of childhood, 154
Twins
dizygotic with juvenile xanthogranuloma, hematologic changes in, 203–206
with perioral dermatitis, 144(c)

Ulcerative colitis, osteomyelitis preceding pyoderma gangrenosum in, 435–438
Uncombable hair syndrome (pili trianguli et canaliculi)
diagnosis, 475–476
with ectodermal dysplasia and vulvar lichen sclerosis, 446–449
Unilateral laterothoracic exanthem (ULE), 152
Urticaria, differential diagnosis, 95
Urticaria pigmentosa, mistaken for child abuse, 484–485(c)

Van der Woude syndrome, 443–445, 459–463
Vasculitis
in childhood systemic lupus erythematosus, 342–346
in HIV/AIDS infected children, 433
leukocytoclastic (*See* Leukocytoclastic vasculitis)
pseudomonas, in premature infant, 122–124
Vasodilatation, for purpura fulminans, 177–178
Venous malformations, 153
Verruciform xanthomas, in CHILD syndrome, 360–366
Viral infections, in HIV/AIDS infected children, 431–432
Virus
in neonatal, unusual presentation of, 38–42
"gloves and socks" syndrome, parvovirus B19 infection and, 413–414(c)
herpes virus 6, 7, and 8, 152
measles, in inner cell of acrosyringium of skin rash, 456–458
papillomaviruses
new directions for, 149–150
in penile lichen sclerosus, 85–90
parvovirus B19 testing in, 71(c)
Vitiligo
new treatment approaches, 152–153
with psoriasis, in nine-year old boy, 242–243(c)
successful bath PUVA therapy for, 53–55
Vulvar lichen sclerosis, with ectodermal dysplasia and uncombable hair, 446–449

Waardenburg syndrome, 235–237
Warts
analgesia, for cryotherapy, EMLA for, 129–133
in HIV/AIDS infected children, 432
peripheral nerve blocks for, 238–241
Wegener's granulomatosis, 352–356
Wiedemann-Rautenstrauch syndrome (WRS), connective tissue disease and, 487–488(c)

Xanthomas
papular, 65–67
resolution in Alagille syndrome after liver transplantation, 199–202
verruciform, in CHILD syndrome, 360–366

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including multiple damages and civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. If the publication had second-class authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
5. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
6. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of second-class authorization.
